About Me

I am a third-year Computer Science undergraduate at UCSC with a strong passion for software engineering, machine learning, and system design. With hands-on experience in full-stack development, I enjoy analyzing complex problems, optimizing systems, and experimenting with new technologies. As a curious and self-driven learner, I actively explore frameworks, cloud platforms, and emerging tools through personal projects and hackathons. I thrive in collaborative, multicultural teams and am eager to contribute to real-world research and software development projects while growing as an engineer in a technically rich environment.

Education

University of Colombo School of Computing (UCSC), Colombo, Sri Lanka

2023 - Present

Bachelor of Science in Computer Science

GPA: **3.55** / 4.0

Sujatha Vidyalaya, Matara, Sri Lanka

2021

G.C.E. Advanced Level – Physical Science Stream

Results: Combined Mathematics (B), Physics (B), Chemistry (B)

Projects

Stellarion - Space Education and Exploration Platform (Ongoing)

A role-based web platform promoting space education via live sessions, interactive content, and community features.

- Developed a scalable full-stack system with dynamic access control (Users, Tutors, Admins, Merchants)
- Built secure authentication, session booking, blogs, and user engagement tools

Technologies: React.js, Node.js, Express.js, PostgreSQL, Firebase, RESTful APIs, SCSS, Modular Design

GitHub: <https://github.com/STELLARION-gp>

Musicia – Music Event Management System

A full-stack event management platform enabling organizers, performers, and ticket buyers to collaborate efficiently with secure booking and payment processing

- Developed full-stack web application with role-based access control, secure authentication, payment gateway integration, and QR code ticketing.
- Implemented real-time collaboration features, chat communication, and reporting dashboards for event analytics.
- Optimized MySQL database queries and implemented unit testing, modular design, and MVC architecture

Technologies: HTML, CSS, PHP, JavaScript, MySQL, REST APIs, MVC Architecture

GitHub: <https://github.com/IrumiTh/Music-Event-Management-System>

Food Store – Cross-Platform Ordering System

A mobile application that streamlines food ordering and management for hotels and customers.

- Hotel owners can create and maintain food items, update availability and prices, and manage incoming orders.
- Implemented order management features, allowing hotel owners to accept or reject orders in real time.
- Customers can browse foods across categories, place orders, and track delivery status.

Technologies: Flutter, Firebase

GitHub: <https://github.com/IrumiTh/Food-Store>

Medical Chatbot – AI-Powered Assistant

AI-driven chatbot for intelligent medical query handling using RAG, NLP, and vector-based document retrieval

- Implemented natural language processing, HuggingFace Transformers, LangChain, and Pinecone vector DB for context-aware responses. gateway integration, and QR code ticketing.
- Developed Python-based API with Flask server, and automated testing for reliable AI interactions.
- Applied prompt engineering, AI model fine-tuning, and scalable deployment techniques.

Technologies: Flask, LangChain, HuggingFace, Pinecone

GitHub: https://github.com/IrumiTh/Medical_Chatbot

Cafe Management System

A simple web application developed to manage daily cafe operations.

- Implemented menu and order management with CRUD operations.
- Designed an interactive and responsive Angular frontend.
- Built RESTful APIs with .NET and integrated PostgreSQL for data storage.

Technologies: .NET, Angular, PostgreSQL

GitHub: <https://github.com/IrumiTh/Cafe-management>

Technical Skills

Programming Languages: Java, Python, PHP, JavaScript, C#, HTML, CSS, C, C++, R, SQL

Frameworks/Libraries: React.js, Node.js, Express.js, Spring Boot, .NET, Angular, LangChain, Jest

Databases/Cloud: MySQL, MongoDB, PostgreSQL, Firebase, AWS

Mobile Development: Flutter, Kotlin

Tools: Git, GitHub, Docker, Linux, Figma, REST APIs, MVC

Certifications

AWS Cloud Technical Essentials – Amazon Web Services (Cloud Computing, AWS)

Supervised Machine Learning – Coursera (DeepLearning.AI) (ML, Python, Data Science)

Unsupervised Learning, Recommenders Clustering – Coursera (DeepLearning.AI)

Advanced Learning Algorithms – Coursera (DeepLearning.AI) (Algorithms, AI, ML)

C++ Intermediate – SoloLearn (Programming, OOP, Software Development)

Professional Skills and Interests

Professional Skills: Problem-solving, Communication, Teamwork, Adaptability, Time Management, punctuality

Interests: Web Development, Mobile App Development, Full-Stack Engineering, Data Engineering, AI

Experience

Intern – Commercial Bank of Ceylon PLC

Jan 2023 – Jun 2023

Gained practical exposure to banking operations, financial services, and customer support while assisting in daily processes and system documentation.
